BALLON D'OR

WHAT IS BALLON D'OR?

The FIFA Ballon d'Or ("Golden Ball") was an annual association football award presented to the world's best men's player from 2010 to 2015. Awarded jointly by FIFA and France Football, the prize was a merger of the FIFA World Player of the Year award and the Ballon d'Or, the two most prestigious individual honours in world football. Unlike the Ballon d'Or awarded by France Football, the FIFA Ballon d'Or, was not awarded based on votes from international journalists, but votes from national team coaches and captains, who selected the players they deemed to have performed the best in the previous calendar year.

WHAT THE PROBLEM WITH IT?

The integrity of the award has been called into question in recent years and it is not hard to see why the Ballon d'Or doesn't matter as much.

Lionel Messi is the current holder of the Ballon d'Or, reclaiming his crown from Luka Modric, who surprisingly won the award following Real Madrid and Croatia's success in 2018. The integrity of the award – alongside many other individual accolades – has been called into question in recent years.

WHAT THE PROBLEM WITH IT?

Frankly, the Ballon d'Or really doesn't matter anymore.

The Ballon d'Or is the most prestigious individual accolade in world football, awarded to the male player deemed to have performed to the highest standard over the previous year. It used to be only journalists who had a say, but from 2007, coaches and national-team captains have been able to vote for their friends and teammates; oh, sorry, the players they think have been the most impressive.

And there is your first problem. The voting system is ever so slightly crooked, but does allow for some excellent entertainment once the voting records are released. Players' votes are as f**ked as the journalists'. In 2019, Passang Norbu – a freelance journalist from Bhutan – had a top five consisting of all Liverpool players and after his Facebook account was discovered, the liver bird on his profile picture indicated why. The Argentine journalist is obviously voting for Messi while sneaking someone like Sergio Aguero in there, and their Portuguese counterpart is clearly going to vote for Cristiano Ronaldo, with Bernardo Silva creeping into the top five. Messi has only voted for Ronaldo twice and the Portuguese has never voted for his arch-nemesis, which is nothing more than, let's say, tactical.

BALLON D'OR FIANANCE

As everything goes to far, we decided that this thing need to be changed and to be replaced

The fact that organizations and organizations with decentralized power have been, are and will be the new trend of the world

While everyone tries to do things fairly and based on the opinion of as many people as possible. The Ballon d'or is too concentrated in power in one or a few certain organizations. This goes against the development trend of the world.

And with the comments made. The organization of awarding should be as transparent and decentralized as possible. That's when the Ballon d'Or Finance plays its role

Anyone holding the \$BDO token can participate in the voting and determine the outcome of the Ballon d'Or Finance

This will be the first prize in the world to be awarded in this decentralized manner. And as I said, it is obvious that the trend of the world shifts towards decentralization and decentralized prizes like these will gradually replace the old, traditional prizes with the same system. corruption and concentration

EQUALLY VOTING FOR EVERYONE

Your vote may not directly elect the winner, but if your vote joins enough others in your voting players, your vote undoubtedly matters when it comes to electoral results

WEB 3: THE THIRD ERA OF THE
INTERNET

Decentralization is a commonly misunderstood concept. For example, it is sometimes said that the reason cryptonetwork advocates favor decentralization is to resist government censorship, or because of libertarian political views. These are not the main reasons decentralization

WHY YOUR VOTE MATTERS

If you ever think that just one vote in a sea of millions cannot make much of a difference, consider some of the closest elections in U.S. history.

In 2000, Al Gore narrowly lost the Electoral College vote to George W. Bush. The election came down to a recount in Florida,

In 2000, Al Gore narrowly lost the Electoral College vote to George W. Bush. The election came down to a recount in Florida, where Bush had won the popular vote by such a small margin that it triggered an automatic recount and a Supreme Court case (Bush v. Gore). In the end, Bush won Florida by 0.009 percent of the votes cast in the state, or 537 votes.

The more tokens you own, the higher the number of votes. And players of course do not need to spend tokens to participate in voting
